

GUM / BONE DISEASE

AT HOME TREATMENT:

Chlorhexadine: Kills all bad bacteria

- Rinse twice a day for two weeks

Tooth and Gum Tonic: Reduces gum inflammation and controls bleeding gums

HIGH RISK PATIENT

- Rinse twice a day for one week after morning and evening meals
- Second week, rinse once per day in the morning after a meal

MODERATE RISK PATIENT

- Rinse once per day in the morning after a meal

Clinpro: Inhibits plaque buildup, strengthens teeth, and increases resistance to decay.

- Use once a day prior to sleeping
- DO NOT eat, drink, or rinse for 30 minutes after use*
